

Low-cost Flashplayer in HD quality

The heddier Flashplayer Pro HD is a low-cost and professional solution for playing video files in HD quality up to format of 1080p (1920 x 1080 pixel). The multitude of available interfaces supports the implementation of multimedia applications.

The video files are saved on a USB Memory Stick 2.0 or on an external hard disc (optional) and can thus be played without any mechanical wear. This guarantees high life expectancy and simultaneously secures operation even under adverse conditions.

The Flashplayer Pro HD operates with play lists and can be controlled by remote via a TCP/IP interface (e.g. World Wide Web). The device features all controlling applications you can expect from a professional Solid-State-Player. Certainly, it is also possible to hook up any of heddier electronic's multiple sensors so that the Flashplayer Pro HD can also be controlled via keys, radar, touch as well as approximation sensors.

On request you can also connect the external input Extension board (Article: FP-PRO-IOB) or the 26 channel IO-Card (Article: IO26). Within the external synchronization board (article: FP-PRO-SYNC) it is also possible to synchronize the multiple Flashplayer Pro HD+.

Technical Specifications

- Supported formats MPEG 2/4, MOV, AVI, VOB and WMV HD (up to 1080p or 40 mbps)
- Play control via playlist, RS485 interface or TCP/IP
- Direct connection of 3 buttons or 6 buttons with diode matrix (NO contact)
- Pushbuttons can be converted to operate as FWD, RWD, Pause, Play, etc.
- RJ45 LAN Interface, TCP-IP, auto detection or manual IP selection
- External control via RS455 interface (Article: IO26)
- External synchronisation via external sync board (Article: FP-PRO-SYNC)
- Support of USB memory sticks 2.0 and optional external 2.5" SATA hard disk
- Connection of external heddier sensors via adapter cards
- IR interface with IR remote control
- Video output YPbPr, AV and HDMI (full HD 1080p support)
- Compact metal case, 160 x 121 x 28 (W x D x H in mm), without connectors
- Working temperature 5 - 40° C, no condensing humidity
- Weight without accessories 320 gram
- Operating voltage 12 Volt DC, max. 2000 mA, power supply 230 Volt / 50 Hz

Areas of Application and Operation

- Interactive HD player for museums, exhibitions and science center
- Interactive HD player for kiosk systems and video presenter
- Ideal playing device for large sized displays and display walls
- HD video player for hotels, restaurants, shopping malls, airports, etc.
- HD video player for interactive tourist information systems
- HD video player for theme parks, go-cart tracks and fun parks, etc.

Further Information

Content of Delivery: Flashplayer Pro HD+, 230 Volt external power supply unit, IR remote control, USB stick with demo data, Connecting cable
Packaging: Paperboard container

Technical modifications and errors reserved.
