

# Armoured Commercial Headphones

Armoured Commercial Headphones with steel shielded cable for theft and damage protection.

## Why choose Commercial Headphones?

Stay away from the leading consumer headphones if you plan to have multiple users share them in museums, exhibitions or in shops. We have studied most of the leading consumer brands and although they produce good sound, most of these models we tested are lacking in the durability department. They range from the obvious, like thin or even dainty cords that will not stand up to the rigors of frequent visitor use, to the less obvious, like having fully or semi-exposed speaker drivers that can be rendered useless by accidental perforation of the diaphragm. Stick with the manufacturers who make special headphones for public areas. They will have thicker cords and plug designs along with slotted baffles (covers) or other means to protect the sensitive driver diaphragm. Consumer brands will not have a warranty for use in public areas.

There are several other features that differentiate a consumer model from a museum model, but it is suffice to say that warranty issues, cord designs and unprotected drivers should disqualify most of the brands sold in consumer electronic stores.

## Areas of Application and Operation

- Headphone for museum exhibits
- Headphone for video and audio stations
- Playback medium for audio player
- Headphone for miscellaneous applications

## Technical Specifications

Type of construction:	vandalism-secured headphone with metal shielded cable
Audio Specifications:	Driver Unit: 40 mm Diameter Magnet Speaker
Impedance:	32 ohm
Sensitivity:	104 dB
Frequency Response:	20-20000 Hz
Operating temperature:	-20° - + 50° Celsius
Description:	Comfortable Headphone with Full Size Earcups High Definition Sound from deep bass to treble Micro Shielded Cable (Protection against RF interferences) 72" (180 cm) length Rubber Coated Metal Armoured Cable Stereo Headphone Jack 3.5mm Size Fits all standard 1/8" Headphone jacks Flat black finish
Weight:	Headphone ca. 230 gram
Scope of Delivery:	Headphone with 180 cm connecting cable
