

Audio kit with 8 Push Buttons

heddierelectronic offers understandable solutions for multimedia audio stations. Including the reinforced heddierelectronic components while being preconfigured and easy to install, heddierelectronic audio kits become a compact package, even technical untrained people can use.

Nevertheless, our support will help you with any problem or question. Feel free to contact our support.

An easy solution for any audio station is the audiokit AK-8T. It comes with a fully preconfigured Flashplayer FP-500, its Power Supply NT-12-2A, 8 Push Button ET-1, the Audio Amplifier HE-HIFI and the necessary Speaker MO-LS. This kit will play audio files whenever someone pushes one of the 8 pushbutton. This gives the ability to use 8 different audio files. If requested, you can upgrade the kit, for example with the heddierelectronic Mirrormaid Touch Sensor (article MM-S).

Audio kit with 8 Push Buttons

Flashplayer FP-500

The heddierelectronic Flashplayer FP-500 is the ideal playback device for audio, video and image applications. The Flashplayer FP-500 is the ultimate solution for long-term operations owing to its compact construction form as well as its robust metal case with integrated cooling fins and mounting angles. In contrast to regular PCs and HD Players, the Flashplayer FP-500 does without any kind loose parts such as fans and hard drives. Hence, nothing stand in the way of operating 24/7.

Audio Amplifier HE-HIFI

The compact Audio Amplifier HE-HIFI is the perfect match for being used with the Flashplayer FP-500. The Audio Amplifier has stereo chinch inputs and an output for stereo-speakers. The maximum output power is 2x10 Watt RMS.

Stainless Steel Push Button ET-1

The product line of heddierelectronic also includes a Stainless Steel Push Button ET-1. It is exceptionally small. Thus it can be integrated into almost any exhibit without difficulty. Properly installed, it is indestructible and will be of good service for a long period of time.

Technical modifications and errors reserved. (V02/15)

Audio kit with 8 Push Buttons

Speaker MO-LS

This all-round Speaker MO-LS with a diameter of approximately 95 mm is an ideal mixture of size and impact. It can be integrated and concealed within almost any exhibit. Its output is powerful enough to drown out nearby noises while at the same time its play-back performance offers an ultimately clear and harmonious sound.

Optional: Hörknubbel (article HS-HK)

Depending on the use of the audio kit, you are able to choose the heddier Hörknubbel instead of the Speaker MO-LS.

Delivery content
