

# Audio station with 10 push buttons and Hörknubbel

The audio station with 10 push buttons and Hörknubbel gives the ability to deliver audio files easily by pressing a push button. It's the visitor's choice which file he likes to listen to. The small size of the interactive audio player IAP-1 gives the ability to hide it inside the station. Thanks to the resistant Hörknubbel a high level of durability and audio quality is given.
