

Open Frame Display HE-17-OFD

The 17" heddier Open Frame Display HE-17-OFD is recommended for the museums and exhibition sector. It was designed for installations in surfaces to turn them into video stations.

The HE-17-OFD can be extended with an adapter board, which has common video interfaces. The display is known for its low power consumption, while it's still effective.

Mounting brackets make it easy to install and give the open frame display the stability needed.

Technical Data

Diagonal:	17" (43.2 cm)
Aspect ratio:	5:4
Resolutions:	1280 x 1024
Brightness:	350 Cd/m ²
Contrast ratio:	1000:1
Response time:	5 msec.
Colours:	16,7 million
Viewing angle:	Horizontal: ±85° or 170° total Vertical: ±80° or 160° total
Size:	358.5 x 296.5 x 22.5 (in mm)
Weight:	1795 g
Delivery content:	Open Frame Display HE-17-OFD Power supply Video connection cable

Technical modifications and errors reserved. (V04/15).
